ULM Nursing recently received a $32,000 grant through the Living Well Foundation to begin the “Safe Sleep A-B-C-D-E” Project. Dr. Debra Craighead is the Principal Investigator and coordinates a team consisting of faculty Ms. Karen Arrant, Ms. Kathy Kennedy, Ms. Connie Lewis, Ms. Linda Reid, and Ms. Sherilyn Wiggins.

The “Safe Sleep A-B-C-D-E” project will take place in several local businesses and hospitals. The ULM nursing faculty as well as the nursing students will work with the pediatric population by providing education and support materials to low income, newly delivered pregnant women, and professional caregivers in order to encourage the use of safe sleeping environments for infants up to 12 months in age.
